CONTEXTUAL INFORMATION

Data in this report reflects self-reported data submitted by each health authority to the Ministry of Health for primary care initiatives in active implementation and or have opened their doors to serve the public. Information in this report was submitted to the Ministry of Health as of March 31, 2025, and therefore may be subject to change, dependent on any retrospective adjustments to reporting submitted to the Ministry after this date.

As this report is intended to be a high-level summary of patient services provided by UPCCs, detailed breakdowns of the data submitted to the Ministry are available separately by health authority and their individual sites.

SOURCE DATA

This report was compiled using Primary Care DataCite (PCDC) UPCC Patient Services form submissions made by each health authority and pulled from PCDC on May 9, 2025.

DATA ANALYSIS

Unless otherwise specified, data provided in this report is from patient visits and encounters provided by all direct care staff. This includes, but is not limited to, Family Physicians (FPs), Nurse Practitioners (NPs), Nursing (RN, LPN), Allied Health Providers (AHPs), Traditional Wellness Providers (TWPs), Community Health Workers (CHWs), and Cross-Cultural Health Brokers (CCHBs).

FOOTNOTES

Important contextual considerations for initiatives are captured in numbered footnotes.

SERVICE MEASURES & DEFINITIONS

Service Measure	Key Performance Indicator (KPI)	Definition
Access	**Unique Patients**	Since the start of the current fiscal year, the total number of patients who have accessed care at the UPCC one or more times, by all direct care staff, reported by each period.
	Unique Patients Since Opening	Since opening, the total number of patients who have accessed care at the UPCC one or more times, by all direct care staff, reported cumulatively by each period.
	Unique Patients Without MSP	The total number of patients who have accessed care at the UPCC one or more times within each period who do not have active MSP coverage (e.g., refugees, immigrants, patients with private insurance).
Patient Volumes	**Total Patient Visits**	The number of patients receiving clinical care[1] in an UPCC on a single calendar day. Each patient will be counted for 1 visit for this day, no matter which and how many direct care staff the patient sees.
	Patient visits for patients who are attached but not to the site	*A breakdown of visits that were provided to patients with an MRP but not attached to the UPCC.*
	Patient visits for unattached patients	*A breakdown of visits that were provided to patients, who do not have an MRP.*
	Patient visits for patients attached to the site	*A breakdown of visits that were provided to patients attached to the UPCC, across all direct care staff.*
Team-Based Care Service	**Total Patient Encounters** *(broken down by provider type)*	Encounters that patients have with direct care staff during their visit to the UPCC. Within 1 patient visit, the patient may have encounters with different direct care staff at the UPCC. All patient encounters are counted for each patient visit.
	Total Patient Encounters Occurring Outside Business Hours	A breakdown of the patient encounters occurring outside regular business hours, defined as weekdays after 5:00 p.m. (M-F), and any hours on weekends and statutory holidays. This is independent of the regular operating hours of the clinic.
	Total Patient Encounters Delivered Virtually	A breakdown of the patient encounters occurring virtually (i.e., direct patient care provided at a distance using telephone, videoconferencing, text, etc.), but does not include indirect patient care.

[1] Clinical care is defined as patient care provided by healthcare providers, including physicians, nurse practitioners, nurses, allied health care providers, and indigenous health providers.

CONTEXTUAL INFORMATION

Data in this report reflect formally approved resources as well as recruitment and financial information for primary care initiatives in active implementation and/or have opened their doors to serve the public. This report is not a comprehensive health human resources report for primary care.

Information in this report was submitted to the Ministry of Health as of March 31, 2025, and therefore may be subject to change, dependent on any retrospective adjustments to reporting submitted to the Ministry after this date.

TARGETS AND EXPECTATIONS

The FTE approved amounts for Primary Care Networks (PCN) set out in this document are reflective of steady state (i.e., expected to be achieved by a PCN's fourth year in implementation). Each PCN has an individual management and recruitment plan that is managed by its own PCN Steering Committee, with oversight from the PCN manager. These four-year targets are shown as 'Total FTEs Approved' on the column headings and are reflective of the Ministry approved amounts in a Service Plan, as well as any Change Requests that have been approved since implementation.

PCNs receive approximately 20% of their funding for recruitment in Year 1, 45% in Year 2, 70% in Year 3, and 100% in Year 4. PCNs that begin implementation of a service plan mid-year are grouped according to year of implementation but are not expected achieve full-year recruitment targets. In contrast to PCNs, CHCs, FNPCCs, NPPCCs, and UPCCs typically receive their full funding immediately, though some are implemented in a phased manner over time.

SOURCE DATA

This report was compiled using financial period tracking templates submitted by each health authority's finance department. The information in these financial period tracking templates is then cross-checked with human resources information submitted to the Ministry through a separate webform. Supplementary information is then obtained from health authorities where variances between these sources occur.

DATA ANALYSIS

As this is a high-level overview report, most data have been rounded to exclude decimals beyond the second decimal place, meaning the grand total may appear different than the sum of the rows (e.g., 0.222 rounds to 0.22 but 4 * 0.222 = 0.888, which rounds to 0.89). Note that the grand totals are calculated using the non-rounded figures and are correct. Baseline approved data have been updated from previous reports to reflect FY 2024/25 Funding Transfer Agreements and approved Change Requests and are accurate as of March 31, 2025.

DATA KEY

Dashes (-) indicate where no resources have been approved. Zeroes (0.00) indicate that no hires have been made to-date. Community Health Worker (CHW) FTEs are included in the Allied Health FTEs' column. Resources covered by overhead and/or change management funding (e.g., medical office assistants, change managers) are excluded from this report.

FOOTNOTES

Important contextual considerations for initiatives are captured in numbered footnotes.

PROVINCIAL OVERVIEW

Leads for different models of care (including health authorities, divisions of family practice, First Nations, and clinic leads) are given significant flexibility around the timing of recruitment in their community. Primary Care Initiatives (PCIs) often first staff up their administrative resources and then recruit care teams with a combination of providers. This data does not capture the many other care providers recruited to communities under alternative payment models, including family physicians (FPs) funded through fee-for-service (FFS) and the alternative payment plan (APP), or outside of PCI service plans.

This section summarizes recruitment status across all primary care initiatives under active implementation. A more detailed breakdown of recruitment status for each specific initiative (PCNs, CHCs, FNPCCs, NPPCCs, UPCCs) is available in **Appendix A – Detailed Recruitment Tables**.

RECRUITMENT AT A GLANCE

As of Period 13 of FY2024/25 (February 28 to March 31, 2025), **2,402** FTEs (+55 FTEs from FY24/25 P12) have been recruited and deployed to over 450 clinics and regional hubs across all provincial primary care initiatives, including 92 PCNs, 15 CHCs, 14 FNPCCs, 3 NPPCCs, and 42 UPCCs.

APPROVED & ACTUAL RECRUITMENT BY INITIATIVE TYPE

[1] *Overall Provincial Breakdown* indicates the total FTE approved and total FTE recruited for each initiative type, as a percentage of all initiatives for the Province e.g., Of all FTE approved for Primary Care Initiatives, PCN FTE approvals make up 61.1% of the provincial total. Whereas, for all FTE recruited for Primary Care Initiatives, recruitment by PCNs make up 62.3% of total provincial recruitment.

Total	**3,501.67**	**2,401.97**	**55.30**	**-**	**-**	**-**

RECRUITMENT IN RURAL AND REMOTE COMMUNITIES

This section summarizes recruitment status across primary care initiatives under active implementation that are either comprised exclusively of and/or physically located in Community Health Service Areas (CHSAs) geographically classified as "Small Urban", "Rural", or "Remote". Detailed information about how CHSAs are classified is available on **Health*ideas* Metaspace**[2]. Initiatives that provide care to a mix of urban and rural/remote communities are also included in this section but reflected separately.

A detailed breakdown of recruitment data for these initiatives is available in **Appendix B – Primary Care Initiatives Serving Rural and Remote CHSAs**.

APPROVED & ACTUAL RECRUITMENT BY INITIATIVE TYPE

Initiative Type	Total FTEs Approved	Total FTEs Recruited		Overall Provincial Breakdown	
		Actual	% Progress	% of Total FTEs Approved	% of Total FTEs Recruited
Dedicated to Rural and Remote Communities					
Primary Care Network (PCN)	517.67	309.56	59.8%	32.2%	34.5%
Community Health Centre (CHC)	43.58	7.30	16.8%	2.7%	0.8%

URGENT & PRIMARY CARE CENTRES (UPCCS)

Many UPCCs use large casual pools, locums, and other staffing arrangements to provide full coverage for their extended hours of operation where regular (full- and part-time) staff have not yet been recruited. Some UPCCs do not provide longitudinal care.

APPENDIX B – PRIMARY CARE INITIATIVES SERVING RURAL AND REMOTE CHSAS

These data tables contain detailed recruitment data for primary care initiatives under active implementation that are either comprised exclusively of and/or physically located in Community Health Service Areas (CHSAs) geographically classified as "Small Urban", "Rural", or "Remote". Detailed information about how CHSAs are classified is available on Health*ideas* Metaspace[4]. Initiatives that provide care to a mix of urban and rural/remote communities are also included in this section but reflected separately.

DEDICATED TO RURAL AND REMOTE COMMUNITIES

[4] Although Health*ideas* Metaspace lists "Small Urban" as part of the larger "urban" category, it is included with "Rural" and "Remote" CHSAs in this report as other program areas in the B.C. Government often align them closer to "rural/remote" than "urban".

TRANSITION - FACTSHEET

Urgent and Primary Care Centres

Topic: Urgent and Primary Care Centres (UPCCs) provide access to same-day, urgent, non-emergency primary care, increase existing primary care capacity, enable new patient attachment, and reduce pressures on emergency departments.

CURRENT SITUATION

- Urgent and Primary Care Centres are one of several team-based models of primary care the Ministry is investing in to support the provincial primary care strategy.
- UPCCs primarily focus on increasing access to urgent episodic primary care with expanded hours of access, but many also provide longitudinal primary care services.
- Currently, 39 UPCCs are currently providing services in temporary or permanent sites.[1]
- Through the first four periods of 2024/25, UPCCs provided 248,279 patient visits (to July 2024). As of July 2024, UPCCs have collectively provided almost three million patient visits and have attached 25,661 patients.[2]
- As of July 18 2024, UPCCs have hired 551.94 full-time equivalents (FTEs), including 124.07 FTE Family Physicians (FPs), 62.36 FTE Nurse Practitioners (NPs), 272.02 FTE Nursing, 80.62 FTE allied health professionals (AHPs), and 4.57 FTE Clinical Pharmacists.[1]

FINANCIAL IMPLICATIONS

- The Ministry has committed to fund $155.59M in annual operating costs for 39 UPCCs which have received a funding letter and are currently in implementation (the numbers are at full implementation), $183.42M in capital and $14.55M in one-time start-up costs.[2]
- Across all UPCCs, 38 have required capital funding, consisting of $138.98M from the Ministry, $16.75M from health authority internal sources, $18.72M from Regional Hospital Districts, and $8.98M from landlords.
- The Ministry's budget includes $543.24M in 2024/25 to support the continued implementation of Primary Care Strategy Initiatives (including Primary Care Networks, UPCCs, Community Health Centres, and Family Physician- and Nurse Practitioner- led clinics).

KEY BACKGROUND

- UPCCs focus on increasing access to urgent/episodic primary care services for patients that require care within 12-24 hours and do not require emergency care. Where there is a demonstrated need, UPCCs will also provide longitudinal primary care to patients attached to the UPCCs. Typically, longitudinal care is focused on underserved populations.
- 50 UPCCs are to be providing services in temporary or permanent locations by December 2025 (Objectives and Key Results [OKR] C.1d). As of July 2024, 39 UPCCs are providing services in either temporary or permanent sites, which will expand to 48 by December 2025. Temporary sites are being explored for 2 additional sites to be operationalized by December 2025.
- As of July 2024, UPCCs have provided 248,279 patient visits in FY 2024/25.[3]
    - Of these patient visits, approximately 16% were provided to patients attached to the UPCC, 47% were provided to unattached patients; and 37% were provided to patients attached outside of the UPCC.
    - As a team-based model of care, patients accessing care in UPCCs had 392,867 interactions with providers to meet their care needs.[4] Of these interactions, 33% were with FPs; 10% were with NPs; 49% were with nurses; and 8% were with allied health or Indigenous health workers.

[1] Results Management Office, Primary Care Division. Primary Care Workforce Report P4 FY2024/25. As of July 18, 2024.
[2] Includes 36 UPCCs with final funding letters and 3 UPCCs which have early draw funding.
[3] Results Management Office, Primary Care Division. UPCC Services Report; self-reported data submitted by the UPCCs. As of July 18, 2024.
[4] VCHA is included in the total provider # but excluded from the provider type % due to an anomaly in their reporting.

- UPCCs are to provide extended hours access for patients. Of the total interactions 35% were provided outside regular business hours.
- UPCCs are expected to focus on providing in-person care. As of July 2024, 15% of interactions occurred in-person.
- All UPCCs include some mental health and substance use (MHSU) access and/or services and can coordinate rapid access to MHSU crisis intervention services. Some UPCCs emphasize care for underserved populations and have more extensive MHSU services (e.g., Vernon UPCC focuses on providing specialized services and support to those experiencing MHSU challenges and Nanaimo provides timely access for patients looking for Opioid Agonist Therapy).

- As of July 2024, visits and attachment to UPCCs are as follows:

Title

IHA, VIHA UPCC expenditures and visits

2024/2025

Information Security Classification: Protected A

Intended Use

This report shows expenditures and visits for UPCCs reporting data to us from IHA and VIHA. Other HA's do no report UPCC data to our data source.

The information contained in this/these spreadsheet(s) is of a summary nature and may be released in its entirety (Cover Sheet and relevant Tabs) for the purpose for which it was provided. However, as it was prepared to address a specific business need, use of the data for other purposes (i.e., alternative analysis or manipulation) is not permitted.

See the 'Notes' page for more information or contact MOHAnalytics@gov.bc.ca for more specific questions/concerns.

Notes

Accounts

Expenditure Accounts: 3*-Compensation, 4*-Supplies, 5*-Traceable Supplies, 6*-Sundry, 7*-Equipment Expense, 8*-Contracted-Out Expenses, 9*-Building & Grounds

Visit Accounts: **450 - Face-to-face visits** - Count of events where recipients are physically present to receive services from medical staff on an individual or group basis for longer than 5 minutes, documented according to the service provider policy, **456 - Visits Not Face-to-face (Virtual)** - Total events where service recipients receive directed services other than face-to-face encounter (i.e. telehealth,on-line) for more than 5 minutes at a time,**436 - Telephone/Telehealth Visits** - Total incoming telephone calls for information, consultation and advice related to general health issues.

436- Telephone/Telehealth Visits is an old legacy account still used by VIHA instead of 456 - Visits Not face-to face (virtual)

Cumulative expenses as reported at Period 13.

At this time only UPCC in Interior Health and Island Health report data to the HAMIS/OASIS databases.
